

About Us

A journey began in a small hangar on the west side of Van Nuys airport with a desire to improve the design of a beautiful and fast aircraft. The center strip of the 2-piece windshield was removed and a single piece windshield was created. Thus, Beryl D'Shannon was born. In 1965 we developed the speed sloped windshield which has become the most popular installation in the fleet. That was over forty years ago. Looking back, we know now we made the right airframe choice to build upon.

Today we still see that handiwork and love for the Beechcraft fleet. The Genesis Conversion[®] by D'Shannon represents the pinnacle of that effort.

Today D'Shannon Aviation is the number one provider of STC's, PMA's upgrades and modifications for the Beechcraft fleet.

- Speed Sloped Windshields and Side Windows

- Aileron and Flap Gap Seal Kits
- Vortex Generators
- Tip Tanks - Now Available! D'Shannon 20 Gallon Canted Tip Tanks

- Raw Power Engine Conversion Kits

- High Efficiency Baffle Cooling Kits
- Louvered gill doors
- Instrument Panel Upgrades

- Hartzell Super Scimitar Props

We continue to look for new ways to improve upon an already excellent airframe. Please join us in continuing to make our fleet all it can be... Realize the Potential of Your Bonanza. Beechcraft Reborn!

We are proud to say that all of our modifications are FAA STC'd PMA'd and Made in the USA!
